No. The whole point of establishing that this work is to be overseen by the AF under their CERCLA authority (other than its the correct way to proceed under Executive Order 12580) is to avoid the need for Region 10 invest resources that duplicate what the AF, their contractors, and ADEC as lead regulatory agency should be doing. At this point, the issues that need to be addressed are well known, documented, and being addressed. We simply don't have the time, resources, or standing to play an active role.

Dave

Daniel Duncan
